STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

ORDER

APPLICATION 14620 PERMIT 9007 LICENSE 5860

ORDER CORRECTING PLACE OF USE AND
AMENDING THE LICENSE

WHEREAS:

1. License 5860 was issued to Tony Aguilar on November 17, 1959 pursuant to Application 14620, and filed with the County Recorder of Placer County on November 18, 1959.
2. License 5860 was subsequently assigned to Curtis Miller.
3. A compliance inspection was made on February 24, 1989 and it was determined that the place of use should be corrected. The correction is needed to show a reduction of approximately 24.1 acres within the place of use and the amendment of the continuing authority term in the license.
4. The USGS (7½') Quadrangle Map Rocklin shows two place of use as being within the SE¼ of NW¼ of Section 34, T12N, R7E, MDB&M.
5. The Board has determined that said correction will not initiate a new right nor operate the injury of any other harmful user of water and that good and sufficient cause has been shown for said correction.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The place of use under this license be corrected to read:

12.9 acres within the SE¼ of NW¼ of Section 34, T12N, R7E, MDB&M.
2. The continuing authority provisions of this license be amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

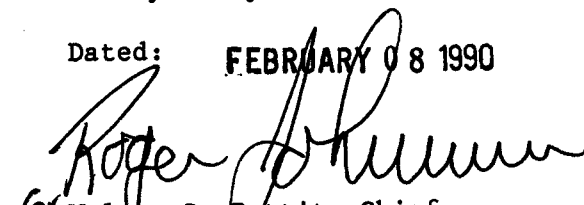

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source.

3

Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
